## TECHNICAL SPECIFICATIONS

### Frost Protection Mats

9' x 3' frost protection mats are constructed from a sleeve of 800 gauge polythene with 1¼" thick, (approx), lagg felt infill. They are eyeleted all round at 3' intervals which enables the mats to be joined together.

The mats have a 'U' value of 0.33, which is the ability of the mat to resist the passage of heat.

The 'K' value is 0.08 on a density basis of watts per square metre per °C, (0.08 W/M<sup>2</sup>K).
